EXPERIENCE

Student organisation - PANEUROPA

- Led the creation and management of the website for the 'Gaming Insights' project, a European gaming conference
- Spearheaded partner outreach and management, developed promotional strategies, and planned the program
- Coordinated various projects and teams
- Designed compelling promotional materials
- Actively engaged in numerous training sessions and workshops to develop and improve both technical expertise and soft skills

PROJECTS

Floorbuilder

Web application developed in React.js. Designed to effortlessly visualise the arrangement of floor panels within any given room.

Portfolio

A portfolio website, showcasing my technological expertise and educational background.

ForumApp

A forum-style website, developed in React.js, facilitating post and comment display, filter change and user interaction. Its implementation leverages the Jsonplaceholder API and Bootstrap framework.

EDUCATION

University of Economics in Katowice

BSc in Information Technology (2022-2025)
